BASIC-ABSTRACT:

Process comprises injection-moulding a uniform mixt. comprising (a) water-soluble polymer(s); (b) pharmaceutical ingredient(s); and opt. (c) plasticiser(s) and/or additive(s).

Pref. water-soluble polymers include water-soluble cellulose derivs. such as hydroxypropyl cellulose (HPC) (esp.) methyl cellulose, hydroxypropylalkyl cellulose, CMC and their salts, polyacrylic acid and its salt, carboxyvinyl polymer, sodium alginate and their mixts. Pharmaceutical components are remedial and/or preventive medicines or veterinary medicines. Pref. plasticisers include polyethylene glycol (macrogoles), glycol and glycerin.

Components evenly melt in time when applied to the affected part and the delayed-action of active ingredients is sufficient.
